Case & Death Demographic Trends

percent of reported cases that include race/ethnicity data is increasing.

Hispanic/Latino 24.8% (13,777,915

American Indian / Alaska Native, Non-Hispanic

Black, Non-Hispanic

13.2% (100,317)

Native Hawaiian / Other Pacific Islander, Non-Hispanic

Asian, Non-Hispanic

3.2% (24,497)

1.1% (8,350)

0.2% (1,829)

**Race/Ethnicity** 

These data only represent the geographic areas that contributed data on race/ethnicity. Every geographic area has a different racial and ethnic composition. These data are not generalizable to the entire U.S. population. If cases were distributed equally across racial and ethnic populations, one would expect to see

CDC is working with states to provide more information on race/ethnicity for reported cases. The

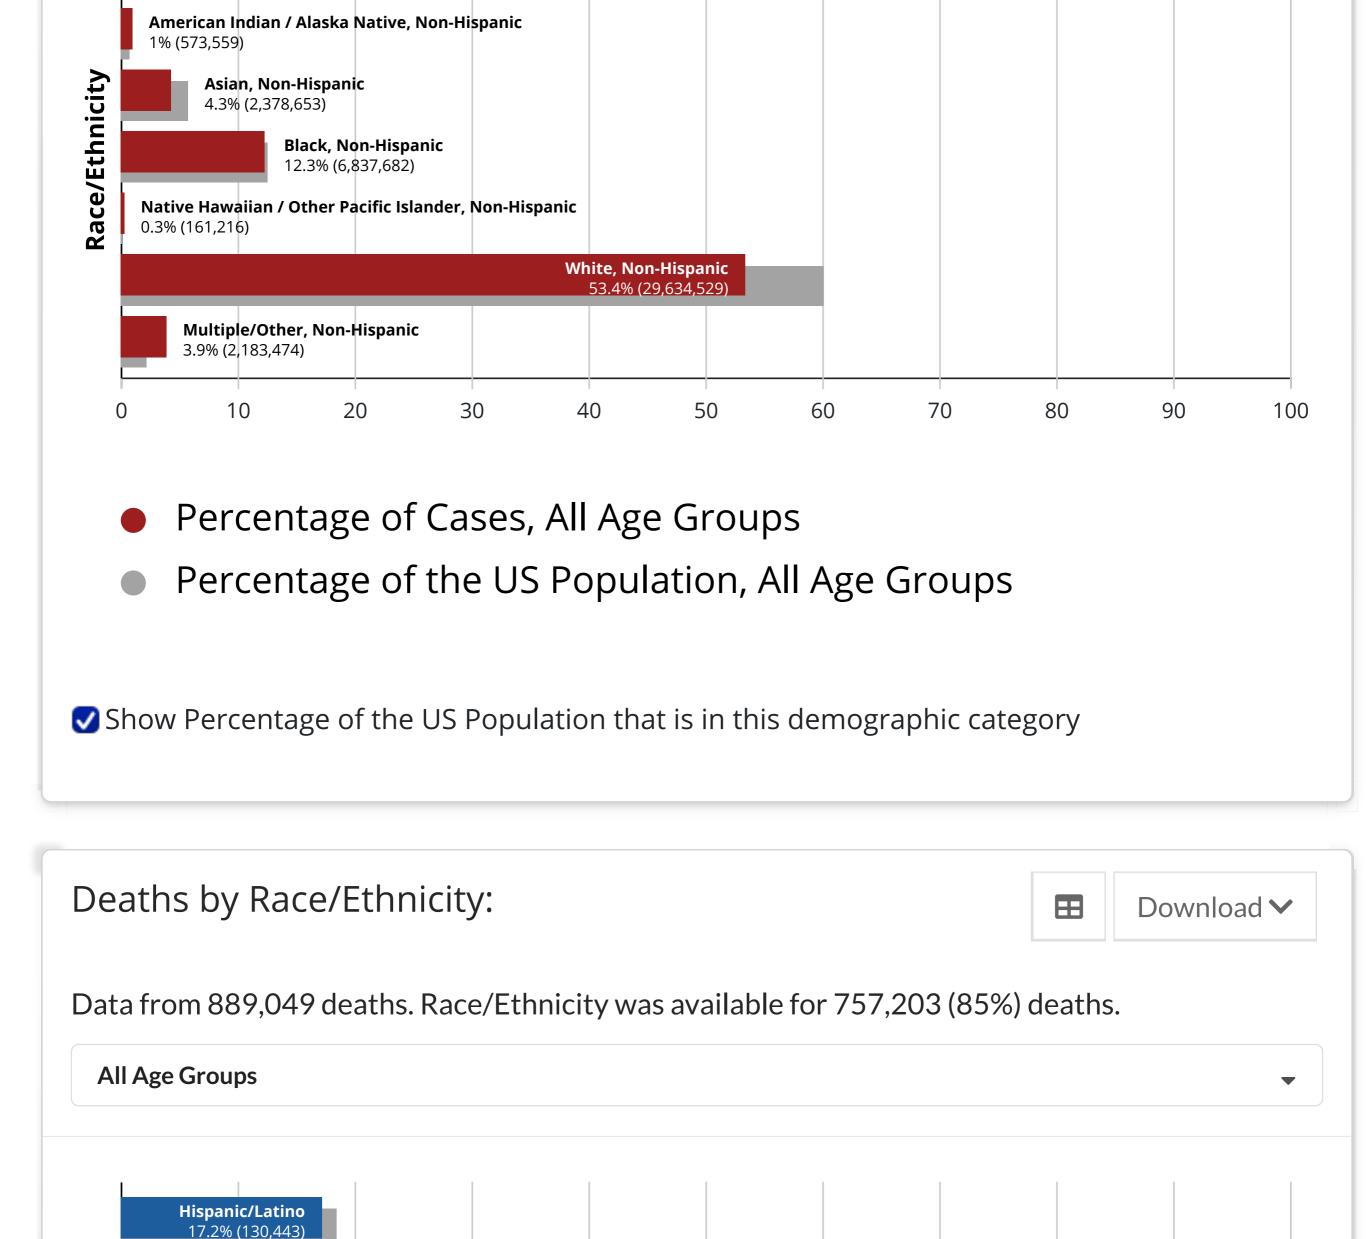

more cases in those populations that are more highly represented in geographic areas that contributed data.

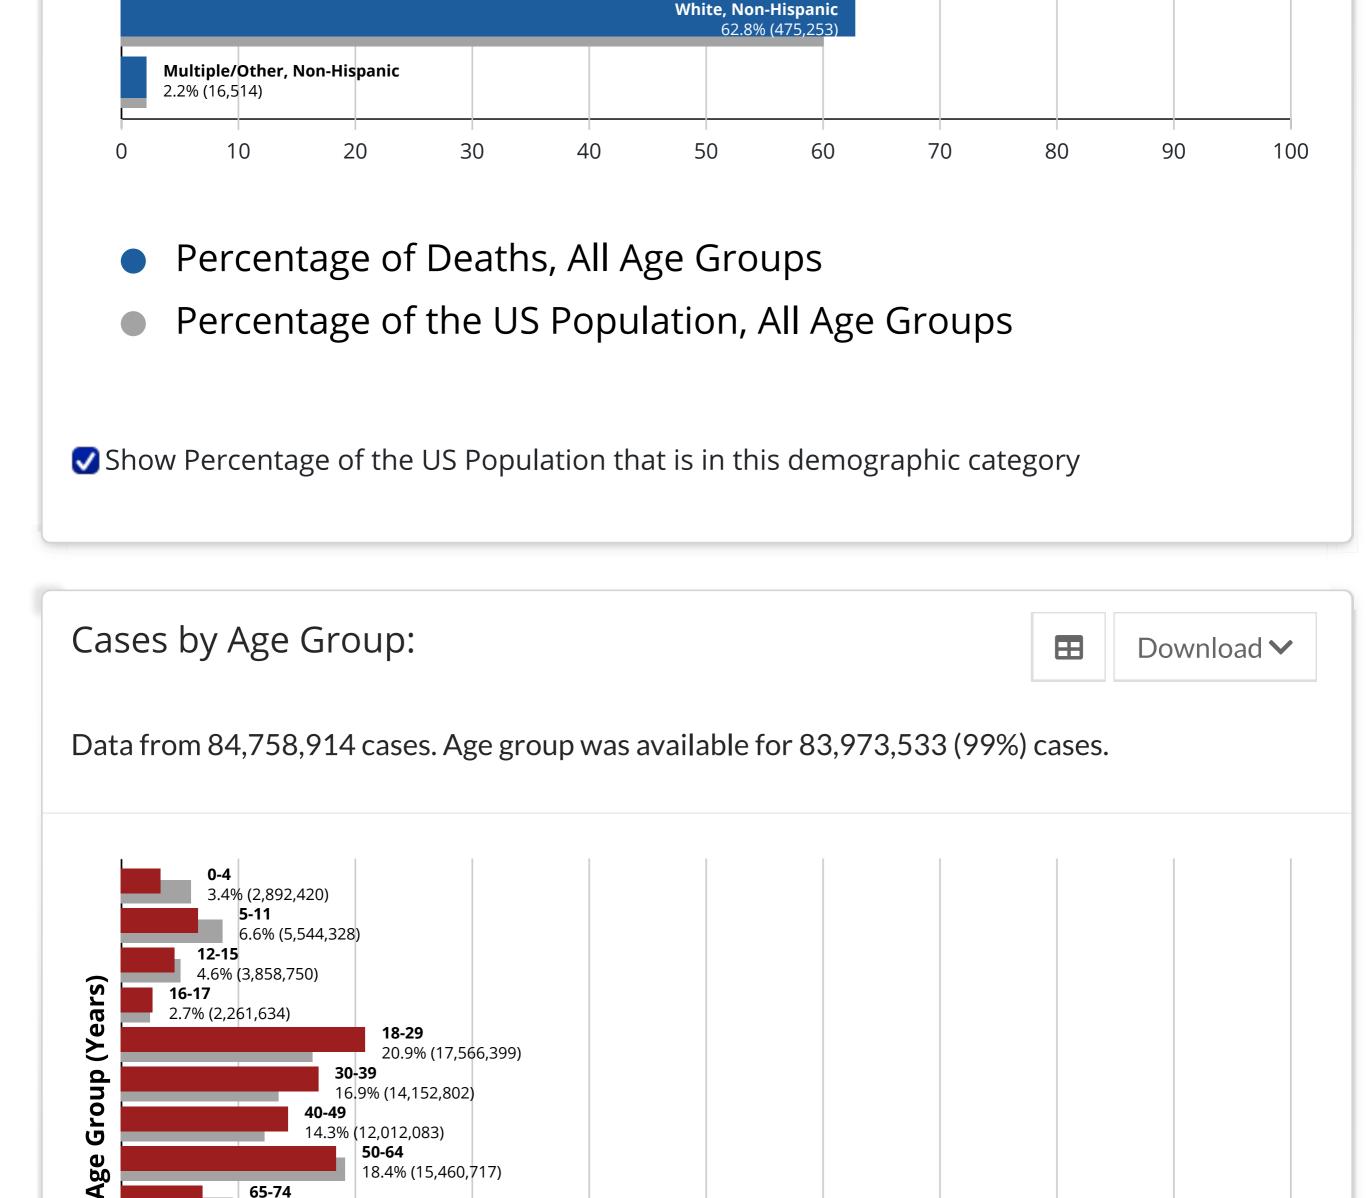

Percentages displayed in the charts below represent the percent of cases or deaths for which the demographic variable of interest is known. Data as of: Monday, August 15, 2022 1:11 PM ET. Posted: Monday, August 15, 2022 2:18 PM

## **COVID Data Tracker** Weekly Review

March 14, 2022: An adjustment was made to COVID Data Tracker's mortality data involving the removal of 72,277

deaths previously reported across 26 states. An error in CDC's algorithm led to misclassifying deaths that were not

Do you need to take extra precautions to reduce your risk
